

## Because I do care about myself

### What is MindLINK®?

MindLINK represents a treatment approach which operates on the basis of patent-registered transmitter technology. It was developed by the dentist and naturopathic therapist HP Dr. Johann Lechner and is now widely used by doctors, naturopathic therapists, therapists and coaches.

### What is MindLINK TEST®?

We all know phrases like "You won't succeed!", "You are not worthy.", "I don't like you!", etc. They are negative programs that can become entrenched in the subconscious and inaccessible to rational corrections. They work as blockages and hampering censors for any positive countermeasure. These blocked emotions reduce our mental stability and our tolerance to stress. Stress, annoyances and overloading may affect our mental and physical well-being.

Many people are subject to an enormous amount of pressure and start to react more and more sensitively and become more susceptible to environmental impact. External factors such as stress, annoyances, noises and e-smog affect our organism, our well-being and eventually, our health.

Whenever possible, you should take care and protect yourself!

The MindLINK TEST software helps finding the mental and emotional blockages exerting psychological and physical effects in a quick and specific manner. It facilitates individual diagnoses and serves as starting point for any kind of therapy. In addition to that, the integrated MindLINK TEST treatment balances mental blockages and problems efficiently by means of positive affirmations.

### MindREFLEX - Kinesiologie

MindLINK operates via patent-registered transmitter technology based on Tesla coils.

They transform information (music, affirmations, sounds of nature) via specific spools into "mind-fields". When the user under test tunes in with the transmitted data, a reflex occurs. This ideomotoric reflex enables the doctor / therapist to access the patient's "inner knowledge" and check for possible directions of development. A percentage score simply determines the aspect with the highest priority.

MindLINK can contribute to improving your inner system and thus have a harmonizing effect.

MindLINK can help compensate negative environmental stress and emotional frailty in a simple manner. By this means, stabilisation of the organism, increased efficiency and tolerance to stress can be achieved.

MindLINK scalar wave technology facilitates the optimised management of the mind and creative conflict resolutions.

### Applications of MindLINK

- Examination of the backgrounds of learning problems and poor concentration
- Nicotine withdrawal
- Taking control of any kinds of anxiety (e.g. fear of flying, spiders or water)
- Weight loss assistance
- Coaching and personality development for employees and athletes
- Solving of motivation problems, improvement in personal efficiency and creativity, development of individual success strategies
- Resolving traumas (e. g. birth trauma) and work-related blockages such as burn-out syndrome
- Identification of behaviour patterns resulting from family dynamics and past context, and much more

## Because I do care about myself

### MindLINK Equipment

MindLINK uses patent-registered transmitter technology based on Tesla coils. They are built into special earphones (MindLINK POINT and MindLINK PHON) and the MindLINK SPOT Sensor. You can order all MindLINK supplies to support your therapy from your doctor, your naturopathic therapist or at [www.mindlink.info](http://www.mindlink.info).

We would like to point out expressly that the methods and instruments shown are a form of experimental medicine and naturopathy and are not scientifically recognised.

For more information about the philosophy behind "Mind Medicine", the applications and the technical design of MindLINK TEST please contact us:

#### MindLINK SPOT Sensor

Tesla loop (appr. 3 cm diameter), can be used without attracting attention:

- to be plugged into a MP3 Player or CD-player
- mobile, flexible
- range: 1-1,5 m

#### MindLINK POINT Earphones

Can be applied to acupuncture and trigger points

- must not be put into the ears
- range: 1-1,5 m

#### MindLINK PHON Headphones

Robust headphones with integrated Tesla loops

- integrated loudspeaker on one side
- particularly applicable with problematic synchronization of the hemispheres of the brain
- range: 1-1,5 m
